GOVERNMENT DEBT FOR AUSTRALIA Vs G7

Abbott is running a scare campaign on Labor's 'massive debt'. It's actually the smallest debt in the industrialised world and helped keep Australia out of recession during the Global Financial Crisis. His policies are to make cuts everywhere and not invest in infrastructure. This is a comparable strategy to playing Monopoly and saving your cash instead of buying properties.

Up to 1Gigabit per second

Up to 100 Megabits per second

Bear in mind that the 100Mbps is an absolute maximum and that speeds will be far less in most places under Abbott's plan. Conversely the nature of fibreoptic networks means that Labor's NBN will start at 1Gbps but is scalable up to 1TBps and beyond - it is only the technology outside the NBN (at either end of the network) that is a limit to capacity.

IN SUMMATION

Tony Abbott is an arrogant, homophobic, xenophobic, misogynistic, backwards, right wing theocrat living in the 1950s who looks awful in speedos. Please don't vote for him.
